Primer: SS4044P Primer

Sealant: Silpruf LM (SCS 2700) Silpruf (SCS 2000)

BASF

Primer: Masterseal P 173

Sealant: Masterseal NP 1

Follow sealant manufacturer's installation instructions. Use sealant materials in their original unopened containers. Comply with sealant manufacturer's recommendations, regarding substrate, location, depth, width and primer. Any deviations must be reported to project architect immediately. Make sure all joints are clean and free of any dirt or foreign matter. Allow Tique Wall Systems materials to fully cure prior to sealant application. Apply sealant primer. Do not apply Tique Wall Systems finish into joint. Install backer rod as specified. Remove excess primer. Apply sealant by gun or knife making sure to fill joint completely. Work surface of bead, leaving a smooth, wrinkle and sag-free surface. Variations in bead are not acceptable. Bead must be in total contact with joint sides. Protect sealant from damage or weather during curing process. Use closed cell backer materials in joint.

Note: Expansion joints and the choice of sealants for use in weather proofing of buildings utilizing Tique Wall Systems Systems and products is the responsibility of the project architect and/or engineer. Tique Wall Systems joint details represent typical conditions and are presented in good faith. Tique Wall Systems assumes no responsibility for joint design or selection of sealant.
